

Opinión de los profesores sobre el método Drama. /Teachers' opinions about Drama

We all agree that drama has been a very useful methodology/activity to deepen in the contents of subjects such as Spanish, French, English, Latin and History.

It has had a great impact in our school. 120 students from 12 to 17 years have taken part in it, with a number a spectators of over 1.000 people including parents and teachers.

Teamwork, lost of fear and the inclusion of all the students of a classroom in a common goal have been the most remarkable aspects to highlight in the project. Drama should be integrated in the curricula of different subjects as English, French, Latin and Spanish and have the possibility to work in close contact with other departments such as Arts, P.E. and Music.

Things to improve for the next years would be to get more time to make it a planned subject that we could include in the curricula, programming the activities in a fixed timetable to get them organized from the beginning of the academic year.
